# A new generation of *intelligent* parking guidance system

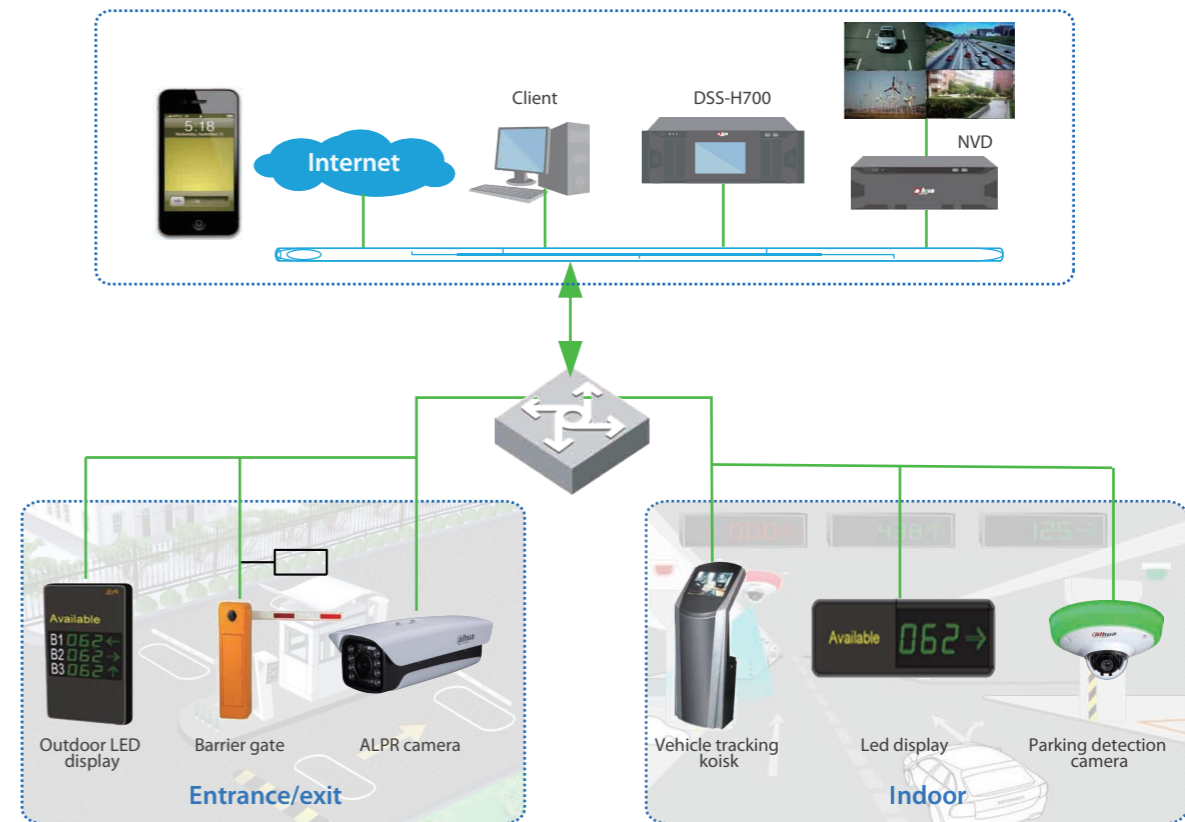

— Help you increase the efficiency and safety of the parking lot

You can drive through the entrance quickly simple by the ALPR camera recognition instead of swiping IC card. You can monitor the vehicle stopped in the parking to confirm whether it is safe. You can also search the vehicle easily by APP in case you will be lost.

## A new generation of intelligent parking guidance system

### System connection

### Key products

#### DH-ITC102-GVRB3A-IR

- SONY 1/3" CCD, 1280×720
- License plate recognition by video analysis
- Embedded OCR, IR led
- 2.8~12mm variable focal length
- White & black list to trig controlling barrier
- Provide multiple interfaces to be integrated into the third part system

#### DH-ITC304-PVRB6A

- 3MP, 2048×1536, 1/3" CMOS
- monitor 3 parking space
- 2 ethernet port, support cascaded connection

\* Design and specifications are subject to change without notice.
